

Figure 1: Identification — Fiscal Composition vs. Containment Stringency
Cross-country means, Q1.2020–Q1.2022. Near-zero correlation validates $S \times F^{\text{CP}}$ identification.

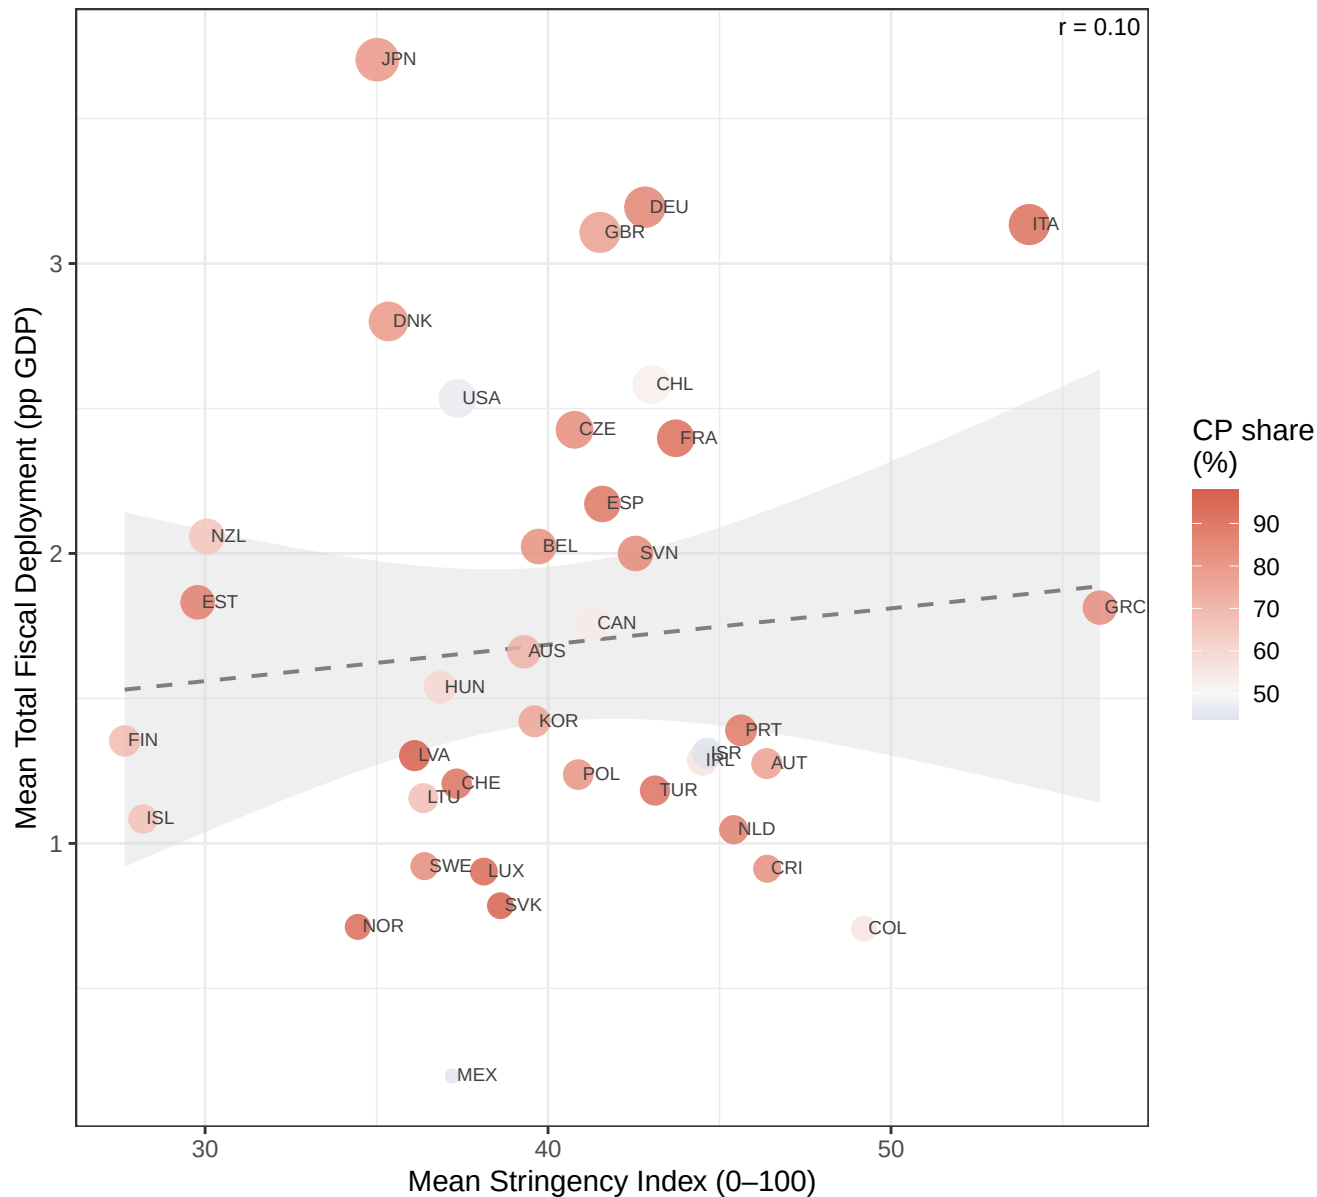

Figure 2: Cross-Country Variation in CP Share of Total Fiscal Package
Q1.2020–Q1.2022. Red dashed = OECD mean. Wide spread is the identifying variation.

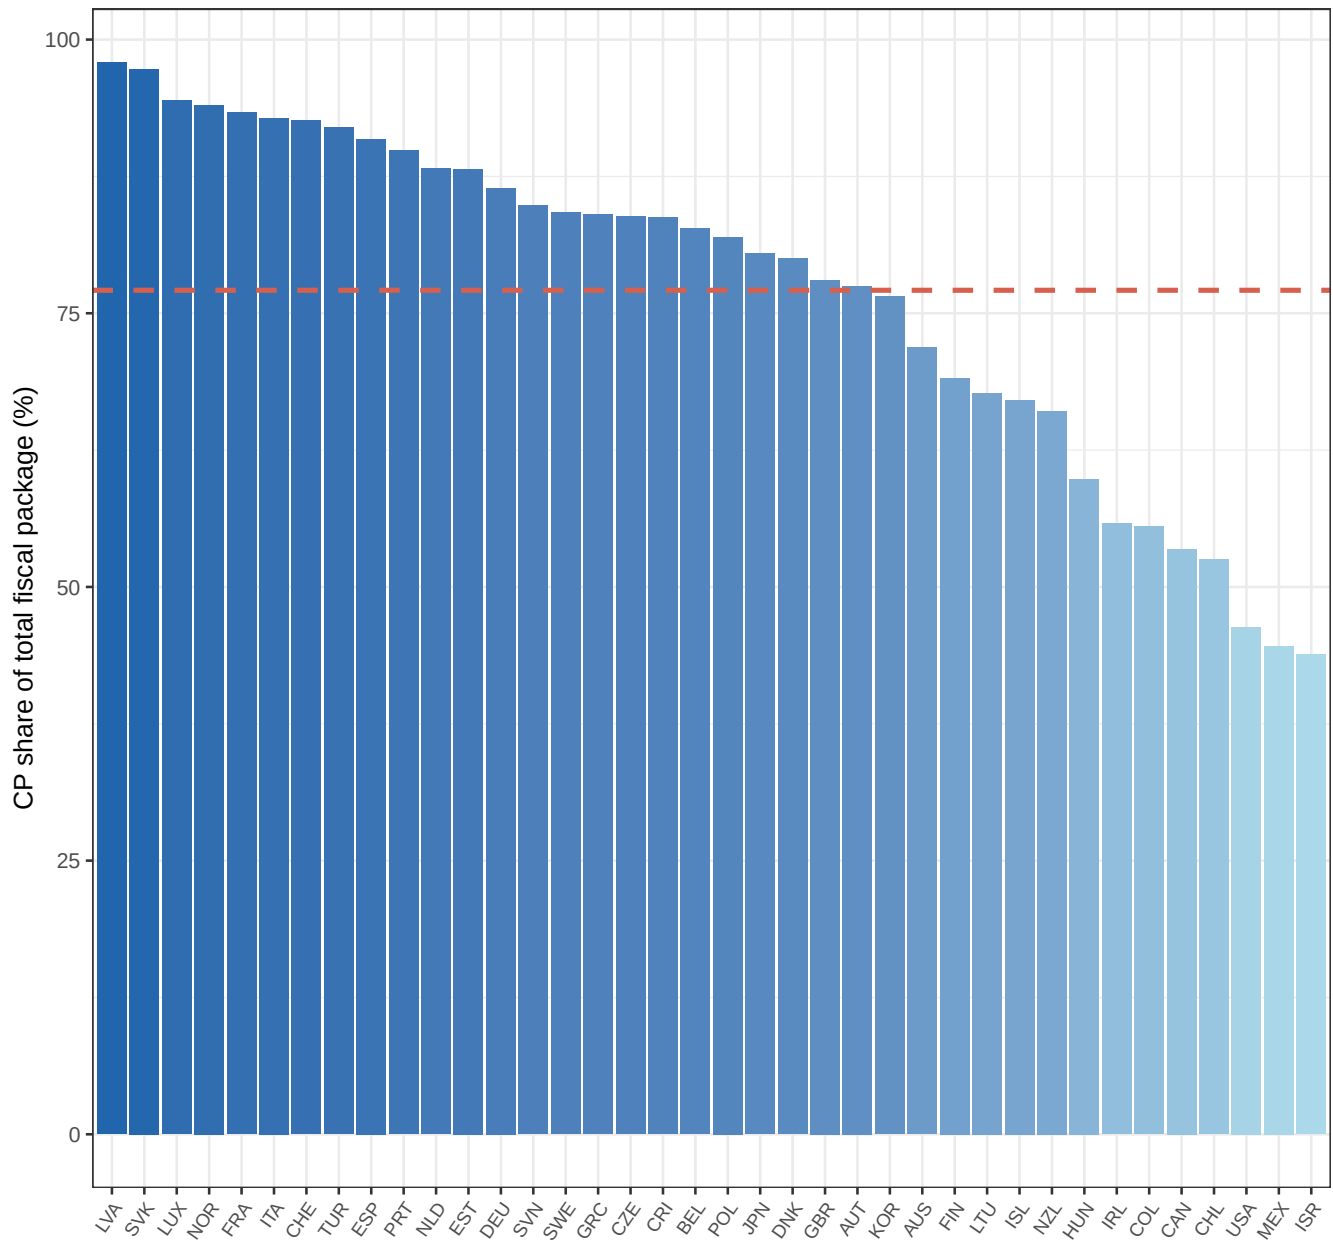

Figure 3: Output Gap — OECD Average (Q1.2020–Q1.2022)

Mean $\pm$ 1 SD across 38 countries. HP-filtered gap, pp of potential GDP.
